AUSTRIAN APPAREL – AAplus (2020)

We all go through phases. We don't always feel the way we felt yesterday. Despite all these phases, we're always drawn to music. It accompanies, touches and feeds us. This debut album is the story of Austrian Apparel and their journey up to this day. "AAplus" stands for inclusion – it takes paths into the openness of sound. It shows two sides.

light and dark.

While the light side features tracks outside of the four-to-the-floor realm, the dark side showcases their club oriented material. Never leaving behind their signature sound forged from their expertise on stage and in the studio. In coherence with their previous work, Austrian Apparel continue to explore an unconventional approach with their audio equipment, departing from a habitual studio process and emerging with a carefully condensed sonic episode of their journey.
